

CleanOut for Outlook 2025.2 Release Notes

The 2025.2 release of CleanOut® for Outlook make it even faster to check and understand your email with more powerful Chat-GPT integration.

- **Message Summary**

The Message Summary feature, which was first introduced in 2023 gave users a concise summary of the conversation, which saved them having to read the entire message.

The 2025.2 release, as shown in the screenshot below allows users to ask follow-up questions and even draft a response. Unlike other popular solutions, like Copilot, this is done without having to copy and paste the message into a panel.

CleanOut for Outlook
2025.2 Release Notes

The Message Summary is powered by ChatGPT and requires you to have an OpenAI account. Refer to page 18 of the [Getting Started Guide](#) for more details.

And much more:

- **Prerequisites**

CleanOut for Outlook Classic has been upgraded to .Net Framework 4.8, which is the latest version from Microsoft.

- **Sunset Versions**

Support for Outlook 2016 and 2019 ends in October, 2025 so support for these versions on CleanOut has ceased also. You should be able to continue to run CleanOut on Outlook 2013 to 2019, as the architecture is the same as Outlook 2024/M365.

Despite the end of security updates for Windows 10 in October 2025, CleanOut will continue to support it for the foreseeable future.

The XBOX version of CleanOut has been deprecated as Microsoft ceases support for critical libraries and browser compatibility on the Universal Windows Platform.

- **Improved stability**

Along with numerous small fixes and the new features mentioned above, the overall usability continues to improve.

Please do not hesitate to reach out if you find something that needs to be fixed, have any questions or suggestions for new features.
